

Do you live in the North West or the North London area? Are you considering IVF treatment? Or are you unsure whether IVF is for you and you just want to speak to a specialist?

Fertility problems affect one in six couples and can cause undue stress and anxiety. To help support couples through their fertility journey, two of the UK's leading hospitals have joined together to extend these services out to the local community.

Many fertility problems can now be overcome with the advances of medical science. However, not all fertility clinics are the same and it is important that couples, and doctors advising couples, are fully informed of the differences between individual units in terms of the range of treatments and special expertise available, how the individual unit would assist a couple and how successful the treatment is likely to be.

[The Lister Fertility Clinic](#) is widely recognised as one of the leading fertility centres in the UK with a long history of proven success. Drawing upon their experience of treating over 2,000 couples on average per year, together with the support given to by satellite fertility clinics elsewhere, The Lister Clinic understands fully the needs of individual couples facing fertility treatment and seeks to respond in a professional and supportive manner.

[The Wellington Diagnostics and Outpatients Centre](#) in Golders Green, one of the satellite fertility clinics of The Lister Fertility Clinic, are holding an Open Day to help provide insight and information on what options are available for people seeking fertility treatment. This is a chance to tour the facilities, informally meet key Lister Fertility Clinic staff and Lead Consultant Gynaecologist, Mr Gidon Lieberman. Mr Lieberman specialises in reproductive medicine and surgery and is experienced in the management of fertility problems with a special interest in reproductive surgery and IVF. Mr Lieberman also leads the fertility service at The Whittington Hospital NHS Trust.
